Hello, I am

Jovanni G

FULL-STACK WEB DEVELOPER

About Me

I am a seasoned web developer with nearly 8 years of experience creating high-quality websites and web applications. I am known for my dedication to delivering excellent results, and I always prioritize clear communication and open dialogue with clients.

With a focus on both system architecture and development, I am well-versed in a range of approaches, from Monolith to Microservices, and I work closely with clients to determine the best fit for their specific needs. My expertise lies in Laravel, NuxtJS, NextJS, and Javascript, and I am always eager to take on new challenges and expand my skillset.

Over the years, I have completed numerous SaaS-based projects, building a reputation for my ability to deliver efficient, effective solutions that meet client requirements and exceed expectations. If you're looking for a skilled, reliable developer to help you bring your vision to life, I am here to help.

Expertise

As a dedicated and efficient full-stack web developer, I am highly skilled in a range of technologies, including LAMP and MERN stacks. With a proven track record of success in managing complex projects, I am known for my resourcefulness and ability to quickly adapt to new challenges.
I am committed to staying up-to-date with the latest developments in software architecture, and I am eager to continue building my skills in server-side rendering. With a strong foundation in both front-end and back-end development, I have a deep understanding of the complete web development process and can provide end-to-end solutions for clients.

If you are looking for a results-driven developer with a passion for excellence and a proven ability to deliver high-quality work on time and within budget, I would love to discuss how I can help bring your vision to life.

Experience

Senior Software Engineer & Lead Web3 Development Team

Xctuality
Singapore
February 2022 - April 2023 (a year)

As the Senior Software Engineer and Lead of the Web3 Development Team at Xctuality, I oversaw the development and implementation of our NFT marketplace, which served as a platform for buying, selling, and trading digital assets. In addition to my work on the marketplace, I was also responsible for managing the web server for Xctuality's game product "Xctualyfe", ensuring that it was running smoothly and efficiently. Through my technical expertise and leadership, I played a critical role in driving the success of both the NFT marketplace and the game APIs, gaining valuable experience in web3 development and web server management. It was a fulfilling and exciting opportunity to work on such innovative projects at Xctuality.

Tech Stack: **Laravel, Nuxt 3, Redis, MySQL, Web3**

Owner & CTO

NeoMart Convenience Store
Cebu, Philippines
November 2017 - February 2023 (5 years)

As the owner and CTO of NeoMart convenience store, I held the responsibility of managing the store's technological requirements, enhancing digital tools and overseeing inventory software. By utilizing my expertise in technology and inventory management, I implemented various technological upgrades to streamline the store's operations and improve the customer experience. Additionally, I led the development and deployment of digital tools to enhance the store's online presence and attract more customers.My contributions as the owner and CTO played a critical role in improving NeoMart's overall efficiency and customer satisfaction, which was a rewarding experience for me.

Tech Stack: **Laravel, NuxtJS, MySQL**

Senior Software Engineer

Winedepot
Sydney, Australia
December 2019 - November 2021 (2 years)

During my time as a senior software engineer at this company, I had the opportunity to contribute to the development process in a significant way. As a full-stack web developer, I led the development process and ensured that our products met high-quality standards. In addition to coding, I also checked my colleagues' work against the company's policies and standards and managed Git branches for the staging server. Whenever a task failed testing, I would quickly reassign it to ensure that any issues were resolved as soon as possible. I am proud of my contributions to the company's success and hope that other developers can learn from my experience.

Tech Stack: **Laravel, VueJS, NextJS, MySQL**

Full-Stack Web Developer

Upwork
Online
November 2015 - December 2019 (4 years)

Accepting various freelance side projects allowed me to earn extra income while also broadening my knowledge on different development technologies, methodologies, and patterns. These experiences not only benefited me but also the companies I worked with, as I was able to bring a diverse range of skills and perspectives to each project. As a result, I was able to provide high-quality work and build strong relationships with my clients, ultimately leading to more opportunities in the future.

Tech Stack: **Wordpress, CodeIgniter, Laravel, VueJS, NodeJS**

Webmaster & Senior Frontend Developer

Agentsquared
San Diego, California
January 2016 - July 2019 (3 years)

In my role as a web designer and developer, I was responsible for designing templates for site app users and developing frontend elements needed for specific client templates. This included creating visually appealing designs that were optimized for user experience and ensuring that all elements were functioning correctly. Additionally, I acted as a webmaster and ensured that everything was in line with SEO standards, making sure that the website was easily discoverable by search engines and ranking well in search results. By doing so, I was able to create a seamless user experience and improve the website's visibility, ultimately driving more traffic and engagement.

Tech Stack: **Wordpress, CodeIgniter, NodeJS, React, VueJS**

Senior PHP Developer

Stockchase | Wealthica
Montreal, Canada
October 2017 - December 2018 (a year)

As the lead PHP developer for the Stockchase site, I was responsible for maintaining and enhancing its features, ensuring that the site was running smoothly and providing the best possible user experience. In addition, I also took part in the development of the base code for the Wealthica app, contributing to its functionality and helping to improve its overall performance. By leveraging my expertise in PHP development, I was able to make significant contributions to both projects, ultimately helping to drive their success and improve the experience for users.

Tech Stack: **CodeIgniter, VueJS, NodeJS**

Wordpress Theme Developer

Whitetower Digital
Sydney, Australia
August 2016 - February 2017 (6 months)

As a part-time Wordpress theme developer for Whitetower, my primary responsibility was to create and customize Wordpress themes for clients. I utilized my expertise in theme development to build visually appealing and highly functional themes that met the unique needs of each client. Through my work, I helped to ensure that Whitetower's clients had access to high-quality themes that were tailored to their specific requirements. My contributions ultimately helped to drive the success of Whitetower and its clients, making it a valuable and rewarding experience for me as a developer.

Tech Stack: **Wordpress, jQuery**

Webmaster & Wordpress Developer

Increase Your Profits
San Diego, California
December 2014 - December 2016 (2 years)

As a lead web designer and developer for IYP, I was responsible for building custom Wordpress plugins and themes that met the specific needs of our clients. In addition to development work, I also acted as the webmaster for our clients, ensuring that their websites were running smoothly and optimizing them to meet full SEO standards, including the implementation of OpenGraph metas. By leveraging my expertise in Wordpress development and SEO optimization, I was able to improve the performance and visibility of our clients' websites, ultimately driving more traffic and engagement. My contributions helped to ensure the success of IYP and its clients, making it a fulfilling and rewarding experience for me as a developer.

Tech Stack: **Wordpress, jQuery**

Wordpress Plugin Developer

NetWebLogic
Spain
July 2014 - December 2014 (5 months)

As a Wordpress plugin developer, my primary responsibility was to build custom plugin extensions for an Event Manager plugin. Leveraging my expertise in Wordpress development, I was able to create highly functional and user-friendly plugin extensions that seamlessly integrated with the Event Manager plugin, expanding its functionality and providing additional value to users. Through my work, I helped to ensure that the Event Manager plugin was able to meet the specific needs of its users and remain a valuable tool for event management. My contributions ultimately helped to drive the success of the plugin and made it a rewarding experience for me as a developer.

Tech Stack: **Wordpress, jQuery**

Microsoft Answer Desk Online Technician

Convergys Philippines
Cebu, Philippines
September 2012 - July 2014 (2 years)

As a Microsoft Answer Desk Online Technician, I provided online technical support for a variety of Microsoft Windows and Office issues. This included troubleshooting and resolving technical issues related to software installation, configuration, and operation, as well as virus removal. By leveraging my expertise in Microsoft technologies, I was able to provide high-quality support to customers, helping them to resolve issues and get the most out of their software. My contributions ultimately helped to drive customer satisfaction and loyalty, making it a fulfilling and rewarding experience for me as a technician.

Graphics Designer & OIC - Link Department

University of Cebu - Main Campus
Cebu, Philippines
June 2011 - March 2012 (9 months)

As a lead graphics designer and officer-in-charge at the Link department, I was responsible for managing marketing media and the student ID processing system. By leveraging my expertise in graphic design, I was able to create visually compelling marketing materials that effectively conveyed the department's message and improved engagement with our target audience. Additionally, I streamlined the student ID processing system, ensuring all student IDs were processed accurately and efficiently.

Through my contributions, I was able to enhance the overall effectiveness of the Link department, resulting in a successful and fulfilling experience for me as a graphics designer and office in charge.

Education

University of Cebu - Main Campus
Bachelor of Science in Computer Engineering
2007 - 2012
