

Hello, I am

Jovanni G

SENIOR SOFTWARE ENGINEER

About Me

I am a seasoned web developer with nearly 12 years of experience creating high-quality websites and web applications. I am known for my dedication to delivering excellent results, and I always prioritize clear communication and open dialogue with clients.

With a focus on both system architecture and development, I am well-versed in a range of approaches, from Monolith to Microservices, and I work closely with clients to determine the best fit for their specific needs. My expertise lies in Laravel, NuxtJS, NextJS, and Javascript, and I am always eager to take on new challenges and expand my skillset.

Over the years, I have completed numerous SaaS-based projects, building a reputation for my ability to deliver efficient, effective solutions that meet client requirements and exceed expectations. If you're looking for a skilled, reliable developer to help you bring your vision to life, I am here to help.

Expertise

As a dedicated and efficient full-stack web developer, I am highly skilled in a range of technologies, including LAMP and MERN stacks. With a proven track record of success in managing complex projects, I am known for my resourcefulness and ability to quickly adapt to new challenges.

I am committed to staying up-to-date with the latest developments in software architecture, and I am eager to continue building my skills in server-side rendering. With a strong foundation in both front-end and back-end development, I have a deep understanding of the complete web development process and can provide end-to-end solutions for clients.

If you are looking for a results-driven developer with a passion for excellence and a proven ability to deliver high-quality work on time and within budget, I would love to discuss how I can help bring your vision to life.
